Nefeli Kyriakopoulou**

# 1st DAY

The 1st day we partook various activities that included; presenting the school, traditional dances and arduino. During those activities we learn about each other, we became closer and we learn some basic arduino programming.

Afterwards, we walked through the city of Heraklion and we saw some of the most famous sights of the city.

## 2nd DAY

The 2nd day we visited the monastery of Arkadi and the Gorge of Saint Anthony. During our visit we learned about the sacrifice the christians made during the occupation of the Turks. Then we visited the city of Rethymno, where we had some delicious Crepes.

# 3rd DAY

The 3rd day we were observing onion cells and bacteria (mold) through the microscope, and analysing water taught by Apostolos. We also did some ice breaking activities, dancing and acting (in groups) in front of the group.

In the evening we went to the museum Ancient Greek Technology of Heraklion by Kotsanas and after that, we went all of us to the Venetian Walls of Heraklion, where Nikos Kazantzakis' grave is, to have dinner together.

# 4th DAY

The 4th day, we went to the Knossos Palace or Minos Palace with a guide, and later on we were to Fodele River to observed small organism that lives in the water with a stereoscope to check if the water was healthy to consume. We were supposed to go to the El Greco's museum but unfortunately it was close.

In the evening, we went together to the bowling alley and celebrated the birthday of our friend Mateo.

# 5th DAY

The 5th day, we stayed at school and we did some lessons on arduino.
