

BE SAFE ON THE INTERNET

❖ Today you are going to learn how to be safe on the internet

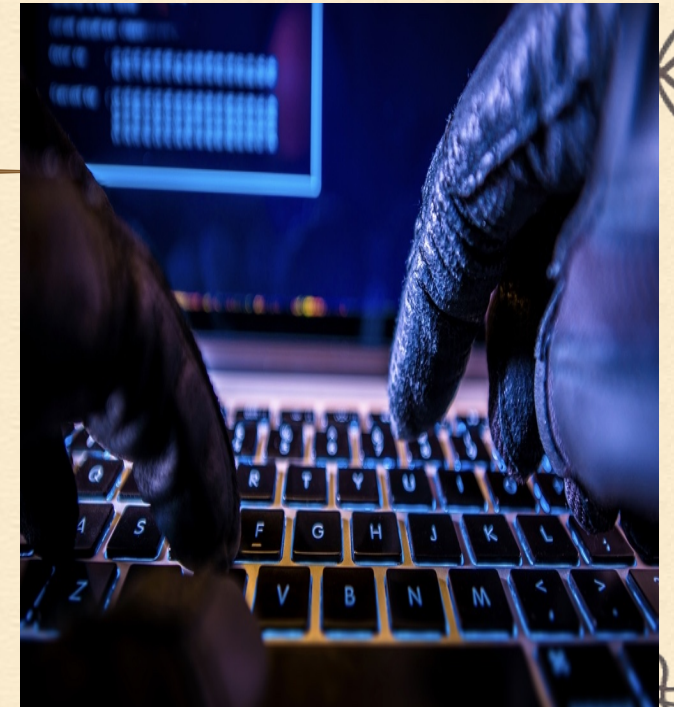

First: never trust strangers on the internet.

```
<!-- text/javascript">
var code = "hack";
if( hack == "this" ) {
  document.write("<b>Hacked!!!</b>");
} else if( hack == "user" ) {
  document.write("<b>Access Granted</b>");
} else if( hack == "admin" ) {
  document.write("<b>Password</b>");
} else {
  document.write("<b>Unknown Resource</b>");
}
//-->
</script>
<p>COMPUTER HACKED</p>
```

Strangers on the internet sometimes are trying to get your personal codes like address or ip. To be safe never click on links or talk to them.

SECOND: NEVER TELL YOUR INFO ABOUT YOUR LIFE.

people in the internet sometimes tell their info about thier life. It could be dangerous cause somebody could know where you live by what you say.

point

THIRD AND FINAL: NEVER TELL BAD THINGS.

By telling bad things people in the internet could be mad and go against you and you could get in big trouble.
